

Pet Tip of the Month September

Keep your loved ones comfortable and healthy:

Even though the weather is getting cooler outside and your four legged family members want to join you on more trips, please remember that it is too hot for them to stay in your car unattended. Even with the windows open, the temperature inside your car will rise 10 degrees for every 10 minutes it sits. This means that if you leave your pet in the car for 30 minutes on a 90 degree day, the inside of your car could be as hot as 120 degrees!
